

Why Choose a Dorrroughby EEC Incursion?

No need to hire a bus!
Our educators come to you.
We supply everything needed
for the activities.
Only \$5 per student for
NSW Public Schools.

Streamwatch

If you have a nearby waterway,
DEEC can come and do water
quality testing and Streamwatch
with your students.

**SPECIFIC TO YOUR
NEEDS.**

**PLEASE CONTACT
DORROUGHBY EEC IF YOU
HAVE AN INCURSION
THAT YOU WOULD LIKE
DEEC TO DEVELOP AND
IMPLEMENT WITH YOUR
STUDENT'S SPECIFIC
NEEDS IN MIND.**

Dorrroughby
Environmental Education Centre

7-12 Incursions

Dorrroughby EEC
is a NSW Department of
Education facility located
20 minutes NE of Lismore.

Experienced teachers
provide sustainability,
cultural and environmental
programs for students K-
12 at the centre, within
schools and at a variety of
other sites e.g
rainforests, wetlands, and
coasts.

DRUMMING FOR WELLBEING

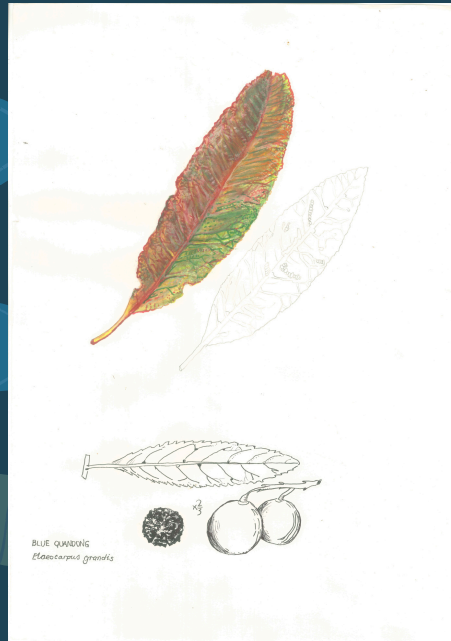

1-1.5 hour drumming activity. DEEC have djembes for up to 30 students. Drumming activities focus on making good choices, good conversation skills, positive interactions and just having fun!

SUSTAINABILITY - SCIENCE

Students take part in an Environmental workshop - outlining the causes and effects of greenhouse gases on our Earth and the basis of Climate Change. Energy, Water, Biodiversity and Waste audits are conducted within the school grounds and then students create a student led School Environmental Management Plan (SEMP) specific to the school's identified need for actions.

S4 - ENGLISH LITERACY - CHILDREN'S BOOKS CAT ON THE ISLAND

Drama-Sustainability-Literature Using as stimulus the book *Cat on the Island*, students explore human impact on a small NZ island. Students discuss environmental literacy and the story from a conservation point of view. Students then decide on which key points of the book to dramatise, create a script based on the conservation messages of the book, create props, and present/film the play.

FIELD STUDY SKILLS SCIENCE- GEOGRAPHY

Field Study Skills Science- Geography DEEC staff will come to your school and run a field study workshop in your school grounds in order to teach students the basics of Geographers tools. Create transects, and collect abiotic data along the transect line. Students learn how to create a field sketch. Prepare students for field studies outside of school grounds.

BIG SCRUB ART WORKSHOP

Students learn about the Big Scrub - its history and cultural significance. They then take part in a botanical art workshop using local vegetation and microscopes to create watercolour botanical drawings.
